Subject: Assistance request for US-89/US-87/MT-3

We are looking for your assistance in reaching out to your association members. There is a slide on the roadway at US-89/US-87/MT-3 at Mile Marker 72.1 east of Great Falls. There is a detour in place but this detour will be difficult for truck traffic to maneuver and will not be able to accommodate any loads that are operating under a special permit (oversize, overlength, overheight and overweight). PLEASE help us get the word out by sending the message below out of all your members or constituents in or around the state. Thank you in advance for your assistance in this matter.

Effective Immediately due to a slide on the roadway US-89/US-87/MT-3 at Mile Marker 72.1 (east of Great Falls between Belt and the Junction of US-87 and US-89) is closed to ALL permitted loads. There is a detour in place but this detour will be difficult for truck traffic to maneuver and will not be able to accommodate any loads that are operating under a special permit (oversize, overlength, overheight and overweight). You will need to find an alternative route.
