The IFTA Clearinghouse has over 10 reports for users to access. These reports various types of data. They can be accessed from the Report Generator link on the home page of the IFTA Clearinghouse website.

The Report Generator page is where demographic reports can be generated and viewed. Select the appropriate report and click RunReport to generate it. The report data is extremely large when downloading and may take some time. Reports are displayed as Text files that can be imported into Excel. Directly converting reports to Excel causes data conversion issues such as the loss of leading zeros. Don’t forget to save the file.

The first few reports are instant file downloads and return files with the data indicated.

At Legatus Solutions...Our mission is to improve business processes throughout the motor carrier ecosystem for continuous compliance at lower costs.

**UNIFY THE COMMUNITY TO MAKE EVERYTHING EASIER FOR EVERYONE**

A whole system provides a solid solution for jurisdictions and its public. The mCarrier Ecosystem design produces highly productive solutions for all stakeholders. We integrate business logic with professional program, project, and information management. Expert technology, certified qualifications, and decades of experience with dozens of governments and thousands of companies within the motor carrier sector.

The mCarrier Ecosystem is a comprehensive set of tools that ensures all records are accurate. It also provides readily accessible tools to rectify inconsistencies or errors across records. The mCarrier Ecosystem lowers costs for both industry and jurisdictions, saves time, improves data quality, encourages higher compliance, and optimizes business and safety decisions.

Our services layer includes simple web services features available to all jurisdictions. These information technology services form a basis for intrastate and interstate fleet services for jurisdictions and industry – whether you use our mCarrier system or not!

- mServices *Commercial Vehicle Views* closes the gaps among SAFER, IFTA, and IRP
- mServices *Fees Calculator* provides accurate fees for both base and (IRP) foreign jurisdiction registration, fuel tax, and permits
- mServices *Fleet Book Information* provides accurate information among IRP, IFTA (including exemptions!), as well as operational constraints
- mServices *Secured Credentialing Cloud* provides a safe, archivist method for exchanging information, including electronic credentials and operational records

Rigid regulatory program boundaries make it harder to comply, so Legatus Solutions works shoulder-to-shoulder with clients to unify the community.

**Thanks for your Sponsorship!**
